

MANO EDU

The multitalent with distance camera and voice

The portable electronic magnifier MANO EDU which comes on a foldable stand and is equipped with two cameras (close up and distance). Both cameras offer an Ultra HD 4K resolution and can be displayed simultaneously on the 12,5" touch display due to its split-screen function. The viewing angle of the display can be adjusted continuously and the keystone correction compensates for distortions. Equipped with a read aloud function, you can capture an entire A4 page at the

touch of a button and have it read aloud to you. The capture of multiple pages in a document and the ability to copy external image and text files from the PC to the device make MANO EDU a multifunctional companion in all situations.

The optionally available MultiView screen does not require a separate power supply, can be mounted above the main display and provides you with the greatest possible convenience when using the distance camera on a regular basis.

Your benefits at a glance

- large 12,5" touch screen (approx. 31,8 cm) touch display on an inclinable stand
- magnification of approx. 1x – 60x in document mode, magnification in real time and text recognition of a full DIN A4 page, split screen function
- operation either via tactile buttons or by zoom gestures on the touch display
- reading camera with integrated LED illumination; distance viewing camera can be rotated in all directions, used as a mirror as well as a second near view camera
- easy to fold and carry with a practical carry handle
- optionally available second display for real split screen function, spare battery and charging station

MANO EDU
