Introduction

Flexibility Inside

The market for wheelchair and standard passenger transportation is always on the move. Multifunctionality is key to delivering good profits in the minibus business. Custom coachbuilders know this better than anybody else. And you know that calls for flexible configurations and quick conversions. Smartfloor sets the pace in this market with RDW, TÜV and VCA approved modular lightweight floors and accessories.

The leading supplier

For over 20 years Smartfloor has been the leading supplier in the Europe for robust, durable lightweight floor components and accessories for minibus taxis. Smartfloor offers safe and flexible solutions for all makes and models. Ingenious attachment technologies allow minibus taxis to be switched over in no time at all from a standard multi-passenger to a wheelchair transportation configuration. And it's just as easy to fit comfortable VIP seats.

Complete

The basis of Smartfloor solutions are formed by three innovative and modular floor systems with guide rails. Thanks to good contacts with importers and manufacturers Smartfloor enjoys on-going access to the most up-to-date and accurate technical data for almost all minibuses, so our lightweight floors always fit properly and anybody can install them easily on their own. As well as the innovative floor components Smartfloor offers a range of accessories such as seats, wheelchair systems and lifts.

Safety first

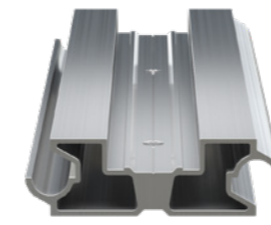

Smartfloor considers the safety of wheelchair users of paramount importance. This safety is key in all product and system innovations. Smartfloor has a well-equipped in-house test centre that is suitable for research and approval tests. Smartfloor floors are M1 certified according to UN/ECE R14, R16 and R17 for all major bus makes. Smartfloor wheelchair fastening systems comply with all international standards and the ISO 10542 standard. The key starting point is to make sure the installation is done in line with Smartfloor's instructions. Never forget: 'safety first'!

Easy to install

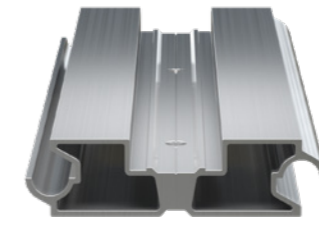

Our manuals tell you clearly how to install Smartfloor products and accessories safely and quickly. Contact us and we will send them to you at no charge.

The Smartfloor plans shown are representatives of those available. However they may not suit all markets.

Smartfloor seat legs are especially designed for intensive use in passenger transport vehicles. Thanks to various spacers, the lightweight Smartleg seat leg can be suited to fit all rail widths in Smartfloor floors. Smartfloor seat legs are easy to install underneath all types of seats from renowned European manufacturers. All seat legs can be delivered with a wheel at the back as an option to provide the highest possible convenience when having to change position or remove seats in wheelchair transport on a regular basis.

- Various spacers to suit every desired rail distance.
- Highly suitable for all M1 and M2 seat types
- Smartleg can be delivered separately or with mounted spacer
- RDW tested on Smartfloor floors in combination with M1 and M2 seats
- Optional wheel at the back for easy manoeuvring in and out of the vehicle
- Robust lightweight construction
- Mounting parts can be delivered as a separate option
- Also available with folding mechanism

- Smartfold seatleg has been tested for all seats up to a weight of 26 KG
- M1 tested and approved by RDW (Test report RDW-76/115-0715)
- Provides a more easy entrance with chairs placed at the door of the vehicle
- Easy to operate by pulling out a pin
- Color: black

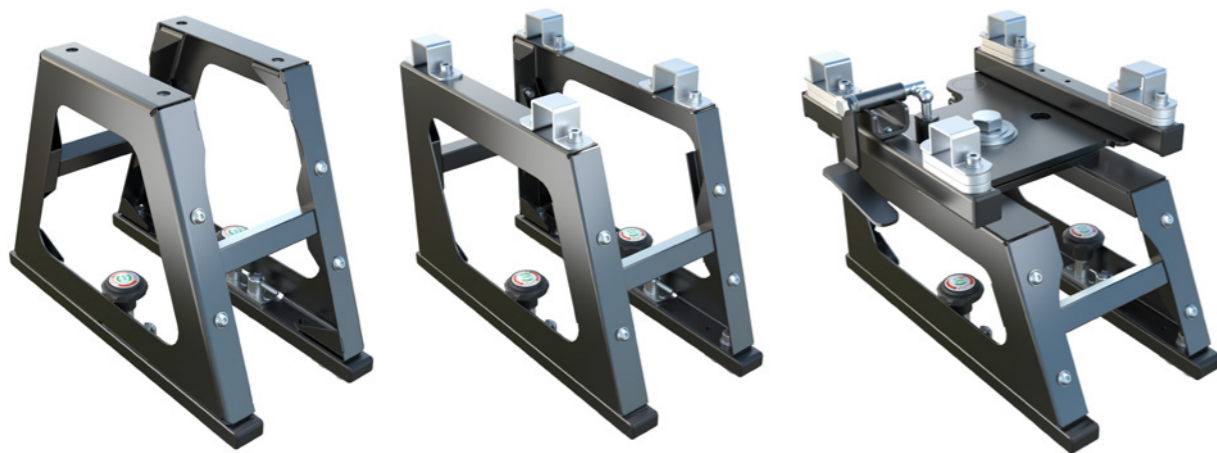

- 200403675 Folding mechanism Ford Transit Custom

- Easy to handle with unlock button and foot pedal
- Seat and seat leg are fixed by screws

Smartfloor introduces a lightweight leg for direct attachment in the airline rails of our Smartfloor. Using the Smartfloor lockable, the leg is easy to lock and unlock. There are 3 versions of the V-Leg that are available in different heights:

- Sliding V-leg, where the leg can be slid into the airline rails from front to back;
- Sliding/Rotating V-leg with the added advantage that the seat on the leg can be rotated 360 degrees;
- Tip&Fold Sliding V-leg, specific for the Smartseat Tip & Fold.

Swivel platforms for driver and passenger seat

The Smart Swivel is now available! A lightweight swivel platform for both the driver and passenger seat. The product has been fully tested according to ECE requirements for M1 and N1 vehicles. The lightweight swivel platform, made of high-grade steel, provides a high degree of rigidity and balance while driving. The sliding mechanism used in our swivel platforms allows the user to easily rotate the seat.

The Smart Swivels are available for many vehicle types such as: Mercedes Sprinter, Fiat Ducato, Ford Transit, Mercedes Vito, Ford Custom, Volkswagen Crafter, Renault Trafic and others. For some models, a so-called handbrake kit is required so that the handbrake does not interfere when turning the seat.

The facts:

- Fully tested according to ECE requirements for M1 and N1 vehicles
- RDW approval
- Available for many vehicle types

The Smartseat Easy M1 XL is designed for maximum passenger comfort and maximum commercial flexibility.

- Fixed or reclining backrest
- Integral 3-point seat belt
- Available in left-hand belt and right-hand belt models
- M1 tested and approved by RDW, according to the newest regulation UN/ECE R14, R16, R17, FMVSS/CMVSS 207, 210
- Optional armrest
- Various upholstery options available (including leather)
- Equipped with quick-release Smartleg supports
- Easy to clean
- ABS back panel

Optional

- Extra Foam seatcushion
- Seatcushion heating
- Piping
- Upholstered armrest

Smartseat
Travel M2

The Smartseat Travel M2 and Smartseat Travel Luxury M2 are designed for maximum passenger comfort.

- Fixed or adjustable backrest
- Integral 3-point seatbelts
- Available in left-hand and right-hand models
- Alongside movable system
- M2 tested and approved by RDW, according to the newest regulation UN/ECE R14
- Various upholstery options available (including leather)
- Equipped with quick-release Smartleg supports

Available in:

- Double seat
- Single seat

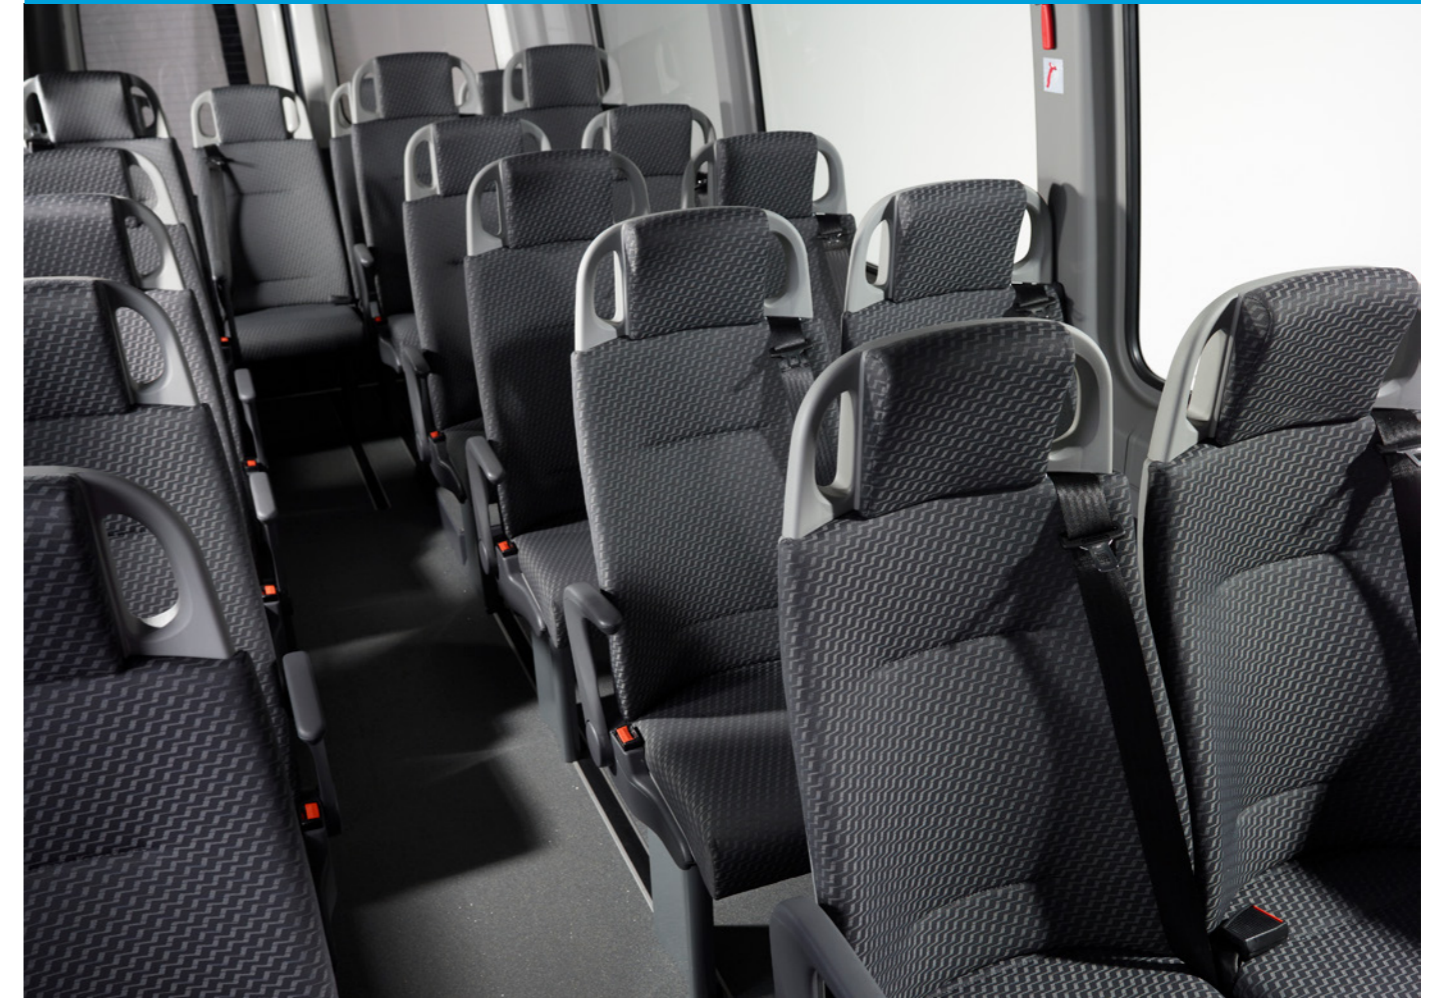

Optional:

- Armrest
- Grab handles
- Foot support
- Yellow /black hand grabs
- Folding table
- Magazine net
- Yellow /black hand grabs

Please contact Smartfloor for more information and all possibilities.

Travel Luxury M2

PROTEKTOR OCCUPANT & WHEELCHAIR RESTRAINT SYSTEM DESIGNED ACCORDING TO DIN 75078 and ISO 10542.

In the 1970s, AMF-Bruns was the first manufacturer in the world to develop a retractor 4-point securement system. Other suppliers followed this example only 20 years later. In the meantime, the AMF-Bruns PROTEKTOR system has become the international standard for securing wheelchairs and their occupants in vehicles.

AMF-Bruns continuous product improvement is reflected in the latest innovation from the inventor of the 4-point wheelchair restraint system. The new PROTEKTOR 2.0 retractors are now even easier to operate, less weight and optimum force distribution in the system in the event of a crash.

With PROTEKTOR 2.0, AMF-Bruns once again sets high standards in terms of safety, design and functionality. No other system secures a wheelchair in a vehicle more dependably than the new PROTEKTOR 2.0 wheelchair restraint system!

The PROTEKTOR 2.0 retractors have an ergonomic profile and an impressive aesthetic design. The compact design reduces weight and is a space saving solution. Thanks to the design, even large wheelchairs can be secured in a small space. The red lever accentuates the release button and contributes to the state-of-the-art design of the retractor. For its intuitive use, ergonomic, function, and design concept, the PROTEKTOR 2.0 system received the RED DOT DESIGN AWARD 2020.

In parallel with this development, AMF-Bruns has always constantly tested the PROTEKTOR system according to worldwide standards since the 1970s.

In all tests, the safety results of the PROTEKTOR system always exceeded the required safety standards. Even in the case of heavy electric wheelchairs, the PROTEKTOR system provides more safety than any other system. Dynamic crash tests at a speed of 31 mph and a deceleration of 20 G, numerous static test series, as well as practical driving tests with wheelchairs and anthropomorphic test devices prove this repeatedly.

AMF-Bruns' high standards are complemented by dedicated work in national and international standards

committees. Close cooperation with institutions including TÜV, the Federal Highway Research Institute (BASt), the Dynamic Test Center (Switzerland) and the Union Technique de l'Automobile, du Motorcycle et du Cycle (France) ensures constant improvement and control of the PROTEKTOR system.

SAFE DIVERSITY: The floor anchorage offers L-Track Fitting and Smart Fitting. The wheelchair fastening can be connected via J-hook, carabiner or loop. The AMF-Bruns PROTEKTOR system is even easier, faster and safer to use than any other system on the market. It is compatible with all wheelchairs and vehicles and is ideal for use with wheelchairs with an integrated lap belt.

PLATINUMSERIES HEAVY DUTY HD160

Wheelchair Restraint System

Weight increases due to electric wheelchairs and wheelchair users require a wheelchair restraint system that can withstand higher loads. AMF-Bruns developed the new PROTEKTOR PlatinumSeries after intensive crash tests indicated the need for more durable and robust retractors. The PlatinumSeries is a heavyduty 4-point securement system for wheelchairs and their occupants, suitable for a total weight of up to 160 kg – creating a new level of safety!

- 4-point securement system for use up to a total weight of 160 kg
- Robust construction and compact design
- Simple application and easy operation
- PlatinumSeries is compatible with all wheelchairs and vehicles
- Complies with ISO 10542, WC18 and DIN 75078-2 with integrated lap belt
- Ensures a safe connection between wheelchair and vehicle, even if the wheelchair deforms in an accident

Back and head support

Smartfloor includes two special back and head support constructions to provide the best possible protection of the back and head of a wheelchair occupant in the event of an accident during transport. Both constructions are suitable for mounting to the floor in an airline rail and flexible in their application at any desired location in the vehicle.

Fixed third belt point

Smartfloor delivers a special 3-point shoulder belt for vehicles that are fitted with an airline guide rail mounted in the top side of the vehicle. By means of this rail, a third belt point can be easily created throughout the interior of the vehicle. The advantage is that the vehicle, in combination with a Smartfloor, meets ISO 10542 standards. Delivery options include either a fixed belt or an auto-retractable belt.

Standard sets

Smartfloor supplies the AMF Protektor in standard sets inclusive of a red, static hip belt. Depending on the options selected, the sets are fitted with either 2 or 4 retractors, safety belt lock or stainless steel open hooks for attachment to the wheelchair. Options further include a static 3-point shoulder belt or a 3-point auto-retractable shoulder belt. For a complete list of all available sets, see the table on the next page.

EASYPULL
Winch & Front Restraint System

The fully integrated wheelchair restraint system acc. ISO 10542 and DIN 75078-2 Standards with automatic winch function. Compatible with EMC (electro magnetic compatibility) in accordance with the European legislation.

EASYPULL
Winch & Front Restraint System

Specification

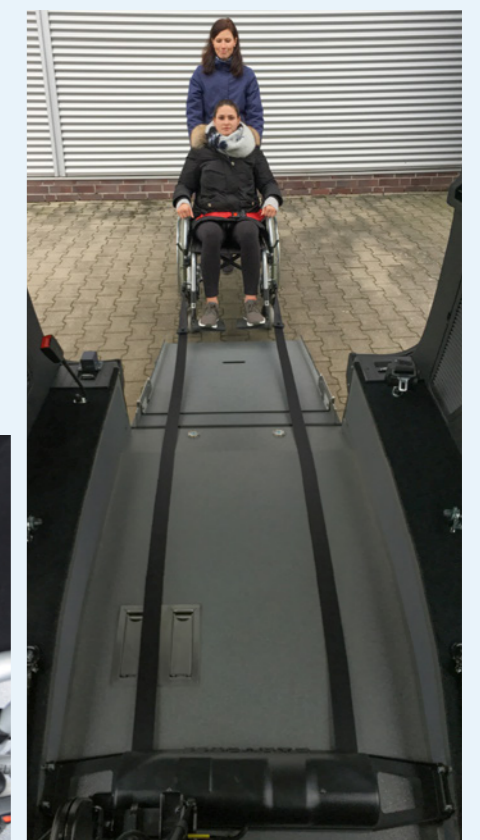

- Easy operation
- Wireless remote control
- Audible signal when belt straps are securely locked
- 4 m belt length
- Easy installation
- Compact design
- 2 speed levels
- 20 G crash tested
- ISO 10542 tested
- Individually adjustable end position of the wheelchair inside the vehicle

RAIL SOLUTION

VEHICLE APPROVED ANCHORAGE POINTS FOR OCCUPANT RESTRAINTS

According to EU directive 2007/46/EG (214/2014 Annex XI, 3) – mandatory in European countries

UPPER ANCHORAGE POINTS

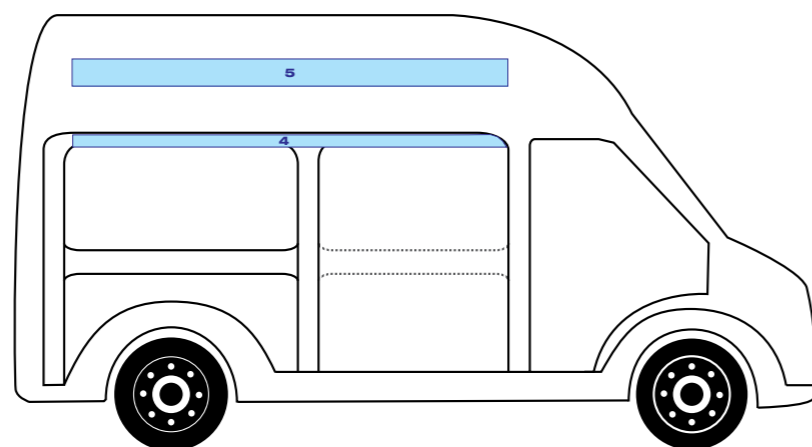

All AMF-Bruns occupant restraint systems – whether static or automatic shoulder belts in combination with a separate pelvis belt or integrated 3 point belt – have been tested with 24.5 kN forwards and 8.2 kN backwards. AMF-Bruns has developed and produces special assembly kits for each vehicle. The pull tests are carried out in our own test centre in cooperation with TÜV.

The assembly kits are compatible with all AMF-Bruns restraint systems.

AMF-BRUNS PROTEKTOR® WHEELCHAIR AND OCCUPANT RESTRAINT SYSTEM FULFILLS THE EU DIRECTIVE 2007/46/EG WHICH CAME INTO FORCE ON 1ST NOVEMBER 2014.

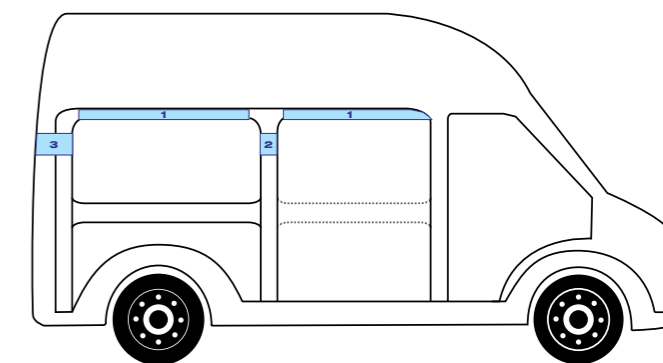

ATTENTION!

The vehicle manufacturer's body fitting guidelines must be adhered to and AMF-Bruns original parts need to be used for the installation!

FOR PASSIVE DRIVERS

AMF-Bruns provides tested head and backrest for wheelchair users. Only AMF-Bruns possesses patented 20 G front impacted and 10 G rear impacted head & back supports.

- Maximum confidence
- Reliable, space-saving and comfortable
- Complies with dynamic crash tests (Euro-NCAP 10 G rear-end collision)
- Suitable for minibuses and cut floor vehicles
- Includes approved integrated 2-point shoulder belt
- Height-adjustable – fits different wheelchairs
- Easy to handle in the vehicle
- Separate, 180° rotatable head- and back support
- Optional: On lockable for Smartfloor application (easy removable)
- The FutureSafe floor mounted i.c.w. Smartfloor is a TÜV tested solution for shoulderbelt use.

With the easy to use head- and backrest FUTURESAFE®, AMF-Bruns is setting a new standard of safety.

- Various crashtests show clearly: FUTURESAFE® ensures the highest level of safety in case of a rear impact.
- On the top of this the integrated shoulderbelt ensures the essential safety in case of a front impact.
- FUTURESAFE® - The only incorporated safety system with head- and backrest.

FOR ACTIVE DRIVERS

Specification

- Maximum assurance, 15 G crash tested
- Height-adjustable – fits different wheelchairs
- 90° rotatable head and back support
- Single solution for active drivers on market according to ISO 10542, Part M
- Easy to operate in the vehicle via a switch on the dashboard
- Compatible with EMC in accordance with the European legislation
- Available for Volkswagen T6 and Mercedes-Benz V-Class

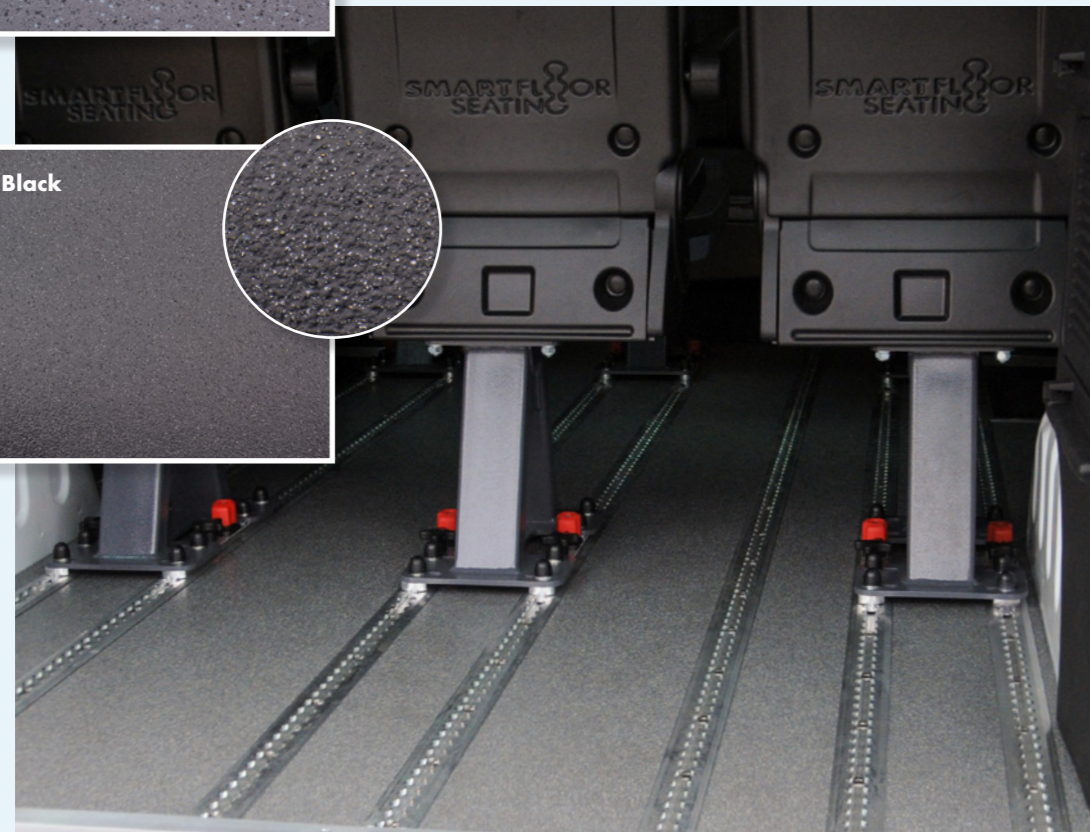

Item code	Item name
200406060	eFutureSafe Head & Backrest for LHD

Smartfloor floor covering is especially designed for intensive use in the transport sector. The anti-skid surface makes this wear-resistant floor covering a perfect and durable solution for use in vehicles and for the conveyance of passengers.

- Safe anti-skid principle, even in wet conditions
- Durable and hard-wearing
- Colour fast throughout the active service life
- Flexible to install near wheel housing and boarding structures
- Dirt-resistant and easy to clean
- Saves fuel thanks to low weight

Composition

Matrix	High-quality vinyl
Ingredients	Aluminium oxide pellets, silicium carbide in the wearing course, quartz basic colour in the surface layer with additional coloured chips for the Altro Transflor Chroma series
Structure support	Polyester cellulose reinforced with glass fibre
Backing	Polyester cellulose
Optional backing	Backing with polyester-like structure (see Altro supplier)

Recommended cleaning method

Thanks to the technical development of Altro safety floors, the floors are considerably easier to clean. Visit www.altro.com/us/products/altro-transflor-meta for extensive cleaning advice from Altro Transflor.

Installation and maintenance

All fitting must be carried out in accordance with the local standards and the Altro Transflor installation manual.

Sub-floor and adhesives In accordance with the recommendations in the Altro Transflor installation manual (see also www.altro.com/us/products/altro-transflor-meta)

Note: failure to comply with the Altro Transflor installation instructions can lead to reduced performance and slip resistance of the floor. The floor must be thoroughly cleaned before delivery and protected during other work.

Altro Transflor Meta and Chroma are not suited for spaces in which it is allowed to smoke, as the risk of burning cigarettes compromising the floor is too high.

Choice of colour

When choosing the colour of the Altro Transflor floor, the volume of traffic in the room must be taken into account. When in doubt, please contact Smartfloor.

Item code	Item name	Measurement

H20187	Mounting kit AMF for Stretcher

These facts make all the difference

- High-precision manoeuvring in various height levels, e.g. for hospital beds, x-ray tables, CT etc.
- The quick-release-fixing allows for an easy fitting to the vehicle's floor
- Big wheels ensure smooth operation on uneven grounds
- The AMF-Bruns stretcher is fully hydraulically adjustable
- The AMF-Bruns stretcher allows for an ergonomic operation.
- The stretcher's suspension guarantees gentle transportation
- The AMF-Bruns stretcher is 10G TÜV tested in all directions according to DIN EN 1789
- In connection with Smartfloor the stretcher can be fixed in various ways to the vehicle - the ideal, flexible solution for the combination of wheelchair and horizontal transportation

THESE FACTS MAKE ALL THE DIFFERENCE

- Fully electric step - automatically deploys when opening the side door and stows when closing the door
- Compact, robust design
- Anti-slip surface
- High-quality processing, absolutely weatherproof
- Powerful motor
- Visual warning signal (dashboard) when step is deployed
- Anti-pinch protection (step stops in case of an obstacle)
- No modification to the vehicle body necessary
- Complies with DIN 75078 and covers 70 % of the vehicle entrance area

Item Code	Item name	Width

Side Steps
High folding side step for sliding doors

Closes the entire entry step when folded up thus creating additional floor space for a wheelchair.

- Easy and fast handling
- Non-slip ribbed surface
- Absolutely noise-free while driving
- Load capacity 150 kg
- Manual handed operation
- Complies with DIN 75078 and covers at least 70% of the vehicle entrance area

Item Code	Vehicle	Wheelbase			Drive		Side step depth	Side step width	Total width	Weight

Side Steps
Rigid side step for sliding door

The fixed step is mounted on the side door under the vehicle. The hot-dip galvanized steel construction makes it particularly robust and weather-resistant. Step with general Vehicle Type approval (ABE). Installation does not require any further examination by the TÜV.

SPECIFICATION

- Robust steel construction (slip resistance R15)
- Load capacity 150 kg
- Complies with DIN 75078 and covers at least 70 % of the vehicle entrance area
- Comfortable access
- No electrical connection required

Fully automatic lift for rear or side door. The AL1 uses aluminium profiles for the unique design of its purpose-built lifting arms. The newly designed aluminum arms make the AL1 the lightest patented lift on the market. The transparent design of the linear platform lift provides excellent rearward visibility.

These points count:

- Patented, newly developed aluminum arms make the AL1 the lightest lift on the market.
- Unique design
- Can be used for rear and side entry
- LED warning lights, optional LED ramp lighting
- Ramp design ensures excellent rear visibility.
- Special safety brake works automatically after contact with the ground, even on uneven terrain
- Access grid serves as an automatic safety brake (patented)
- Crash safety stops for greater passive safety
- High-quality powder-coated finish, with CDP coating as additional corrosion protection
- EMC-tested in accordance with EU directives
- Meets EN 1756, II and DIN 75078, 1
- 20G collision tested

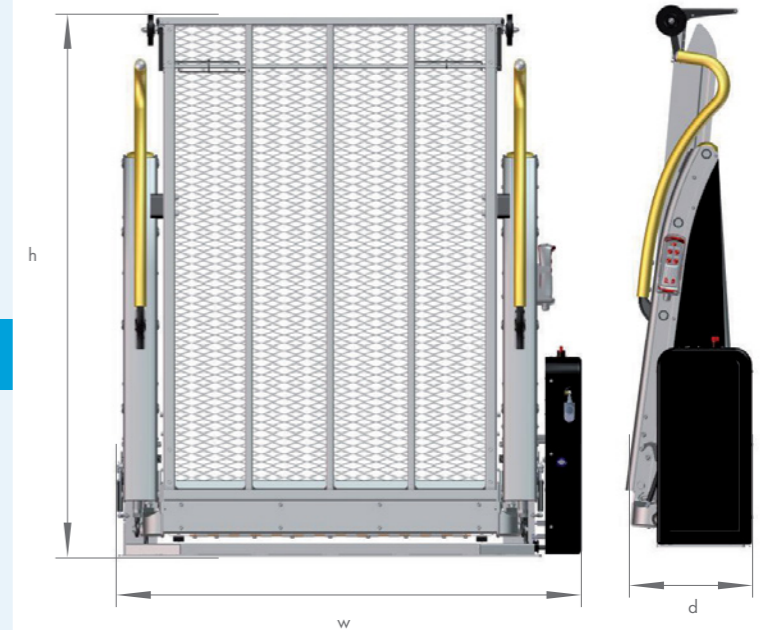

Technical data

- 900 mm lift height
- Load capacity 400 kg
- Weight Depends on ramp size between 120 kg and 130 kg
- Operation single-handed with 4 push buttons (up/down, park/operate)
- Manual pump, two rails, automatic warning lights
- Power, 12 V electro hydraulic motor

Optional

- Bluetooth remote control or App operation (IOS, Android).
- Remote control available
- 20G tested mounting kits for vehicle models like Mercedes-Benz Sprinter, Volkswagen Crafter, Volkswagen T6, Renault Master, Opel Movano, Ford Transit

Linear lifts
AMF-BRUNS - AL1 Split Platform Lift

Fully automatic lift for rear or side door. The AL1 uses aluminium profiles for the unique design of its purpose-built lifting arms. The newly designed aluminum arms make the AL1 the lightest patented lift on the market. The split ramp ensures a clear view to the rear yet allows entry and exit through the rear door.

Benefits

- Patented, newly developed aluminum arms make the AL1 the lightest lift on the market.
- Can be used for rear and side entry
- LED warning lights, optional LED ramp lighting
- Three standard ramp sizes available
- Ramp design ensures excellent rear visibility.
- Special safety brake works automatically after contact with the ground, even on uneven terrain
- Access grid serves as an automatic safety brake (patented)
- Quiet ride with rubber-mounted ramp in stowed position
- Crash safety stops for greater passive safety
- EMC-tested in accordance with EU directives
- Meets EN 1756, II and DIN 75078, 1
- 20G collision tested

No liability whatsoever can be accepted for variations due to technical changes or vehicle-specific equipment. Please feel free to contact Smartfloor if you are in any doubt.

Fully automatic lift for rear or side door. The AL1 uses aluminium profiles for the unique design of its purpose-built lifting arms. The newly designed aluminum arms make the AL1 the lightest patented lift on the market. The panorama platform allows the installation of a large lift in vehicles with low interior height.

Benefits

- Patented, newly developed aluminum arms make the AL1 the lightest lift on the market.
- Unique Design
- Can be used for rear and side entry
- LED warning lights, optional LED ramp lighting
- Two standard ramp sizes available
- Ramp design ensures excellent rear visibility.
- Suitable for vehicles with a low roof
- Special safety brake works automatically after contact with the ground, even on uneven terrain
- Access grid serves as an automatic safety brake (patented)
- 900 mm lift height
- Crash safety stops for greater passive safety
- High-quality powder-coated finish, with CDP coating as additional corrosion protection
- EMC-tested in accordance with EU directives
- Meets EN 1756, II and DIN 75078, 1
- 20G collision tested

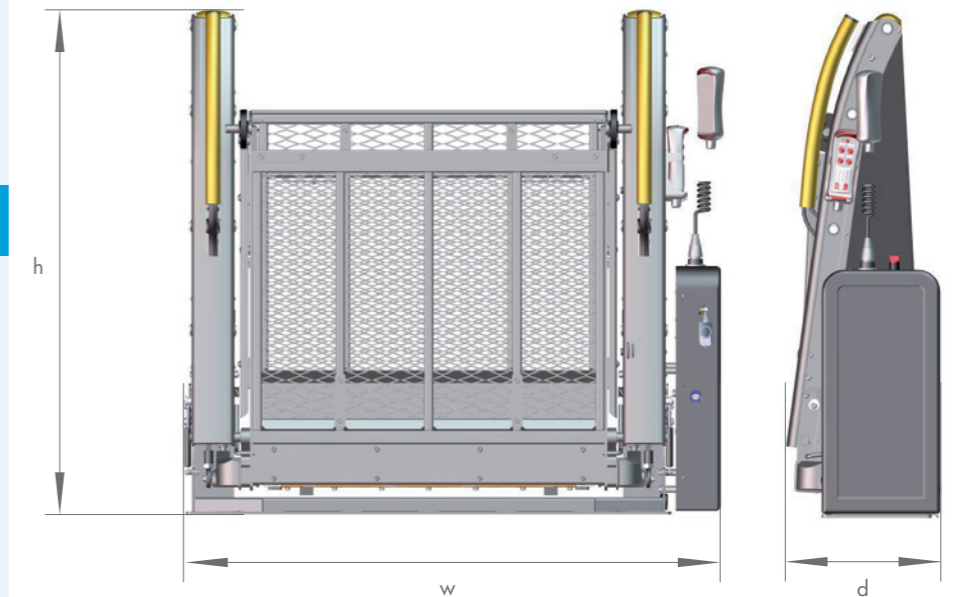

Technical data

Load capacity 400 kg
Single-handed operation with 4 push buttons (up/down, park/operate)
Weight depending on platform size; between 135 kg and 140 kg
Manual pump, two rails, automatic warning lights

Option

- Bluetooth remote control or App operation (IOS, Android).
- Remote control available
- 20G tested mounting kits for vehicle models like Mercedes-Benz Sprinter, Volkswagen Crafter, Volkswagen T6, Renault Master, Opel Movano, Ford Transit

Optional

AMF-Bruns has developed a standardised operation for all cassette and linear lifts. Standard operation of the newly developed control unit (for cassette and linear lift) is a hand control with cable connection to the lift. Additionally a remote control unit is available as a wireless version, with handset operation or new smartphone app (iOS, Android).

Mobile operation via App

- Intuitive operation
- Mobile remote control covers all functions and tools from the original remote control
- Available for Smartphones (iOS and Android)

The ultra-slim AMF-Bruns cassette lift for the side loading door

The cassette lift K70 is the flattest back-in-the-box lift of its kind for the side door. The lift is installed underneath the vehicle floor in order to make the best possible use of the available space within the vehicle. The large lifting platform is suitable for large electric wheelchairs. The cassette lift K70 is only suitable for vans such as Volkswagen T6 or Renault Trafic L2.

Specification

- Load capacity 300 kg, complies with EN 1756, II
- Ultra-slim design (70 mm) guarantees ultimate ground clearance
- New illuminated controls, waterproof and shockproof (!)
- Automatic barrier operates on uneven roads and snow, too!
- Original step is obtained
- Vehicle interior remains unchanged
- Powerful, quiet action ensures smooth operation of the lifting platform
- Totally enclosed stainless steel box provides protection for the lift system even in extreme weather conditions
- Manual emergency operation
- No changes to the car body necessary
- EMC tested according to EU-regulation 95/54/EG/EC
- Original tank is replaced by an AMF-Bruns tank (only Diesel engine)
- Obtaining original tank at bad road suspension

Technical Data

» Hight	70 mm	» Deploying/ stowing	Approx. 12 sec.
» Load capacity	300 kg	» Control	By push buttons
» Platform size	Approx. 760 x 1.200 mm	» Power	Lifting and lowering electro-hydraulic 12 V; deploying and stowing driven by 12 V electric motor
» Unladen weight	Approx. 170 kg		
» Lifting/Lowering	Approx. 7 sec.		

Optional

Bluetooth remote control or app operation (iOS, Android)

K90

A cassette lift is installed underneath the vehicle floor in order to make the best possible use of the available space within the vehicle. A cassette lift can be installed at the side of the vehicle. The AMF-Bruns cassette lifts are only suitable for installation in passenger transport vans such as VW T6 and larger. We provide special rear-squat solutions for passenger vehicles.

- Load-bearing capacity of up to 300 kg
- Platform is also suitable for electric wheelchairs
- Easy electro-hydraulic dual-button operation
- Ultra-slim design to save floor space within the vehicle
- No alterations in the vehicle needed
- Fitted with manual emergency operation
- Platform weight 140 kg

K90 Active

1 METER OF FREE SPACE IS ENOUGH

The AMF-Bruns K90 Active lift is a high-quality cassette lift for active and independent wheelchair users.

Extremely suitable for narrow parking spaces

Narrow parking spaces are no longer an obstacle, thanks to a platform width of less than 70 cm on the ground. For maximum ease of use, the lift platform can be accessed from both sides, parallel to the linear direction of the vehicle. Ideal in parking spaces with cars parked on both sides of the vehicle, or in a busy street with cars parked both in front and behind the vehicle.

Ultra-slim

As so little space is needed, the K90 Active is easy to install. The lift is fitted underneath the vehicle's sliding door at the right side of the vehicle. Thanks to its ultra-slim design, you only need a maximum of 90 mm underneath the vehicle to install it. The vehicle's interior remains fully intact. This lightweight lift guarantees quick, simple and convenient use.

- Lift platform accessible from two sides
- Load-bearing capacity of up to 200 kg
- Fast and simple to operate
- Ultra-slim design to save floor space within the vehicle
- No need for vehicle alterations to the bottom

The K90 Active can only be installed in passenger vans such as Volkswagen T6 and larger.

K90

K90 Active

Item Code	Description	Dimensions (w x h)
10023012	K70	760 x 1.200 mm
10023013	K70 with lateral access	760 x 1.200 mm
H 9000	K90	800 x 1.200 mm

Yes (1) = only right side of vehicle

Yes (2) = also with 4Motion

Cassette lift K90 Active on request.

Telescopic ramps for side and rear doors

When required the ramps are positioned one after the other on the edge of the vehicle door. Roll the wheelchair over the ramps into the vehicle. This can be an empty wheelchair as well as one carrying an occupant. When not needed, the telescopic aluminium ramps can be conveniently stored in the vehicle. It should be noted that the ramps are extremely light and can be carried in much the same way, for example, as a carrier bag by the handles on the side.

- Load capacity: up to 2 x 150 kg
- Total length: 2 m (collapsed 1.2 m)
- Weight: approx. 12 kg
- Easy to handle, easy to operate
- Stable construction
- Extremely lightweight due to special aluminium profiles
- Foldable to manageable dimensions
- Easy carrying with the provision of a grab handle
- Applicable for all estate vehicles
- Suitable for all combi-vehicles
- Can be mounted on the rear or side doors
- Slip resistance class R11

Item code	Item name	Length
10022633	Channel Ramp	2 m

AMF-Bruns Telescopic Ramp

Technical data

- Raising / lowering mechanism: Powerful, low noise 12V hydraulic power unit
- Drive: Electro-hydraulic from the vehicle battery
- Lowering control: Rocker switch in the rear of the vehicle
- Raising control: Automatically when rear door is being closed

Optional

Ramps in different sizes (see ramps)

Vehicle ready for departure (standard height).

Lowered vehicle.

Item code	Vehicle model	Including
10022600	Volkswagen Crafter (old) MWB / Mercedes-Benz Sprinter MWB	Hydraulic kit for lowering suspension – without ramp
10022601	Volkswagen Crafter (old) LWB / Mercedes-Benz Sprinter LWB	Hydraulic kit for lowering suspension – without ramp
10023226	Fiat Ducato / Citroën Jumper / Peugeot Boxer / Dodge RamMaster	Hydraulic kit for lowering suspension – without ramp
10023007	Volkswagen Crafter / MAN TGE	Hydraulic kit for lowering suspension – without ramp
10023266	Volkswagen T5 / T6	Hydraulic kit for lowering suspension – without ramp
10023273	Ford Transit (F7) MWB	Hydraulic kit for lowering suspension – without ramp
10023279	Ford Transit (F7) LWB	Hydraulic kit for lowering suspension – without ramp
10022613	Renault Master / Opel Movano / Nissan NV400	Hydraulic kit for lowering suspension – without ramp

A vehicle with a rear cut floor is the ideal solution for passive drivers. The rear cutout with access ramp allows the wheelchair user to be transported comfortably. The non-slip ramp allows easy access to the vehicle, where there is plenty of space in the passenger compartment due to the lowered floor pan. Protektor wheelchair & occupant restraint systems are provided to secure both the wheelchair and the wheelchair occupant. Extra protection is provided by the FutureSafe head & backrest.

THESE FACTS MAKE ALL THE DIFFERENCE:

- Rear cut floor with access ramp
- Spacious passenger cabin
- Protektor wheelchair & occupant restraint system (ISO approved)
- Extra long front electric belts for the wheelchair
- Optional: EasyFlex ramp can be converted quickly to a loading area – ideal for flexible use of the vehicle, FutureSafe head & backrest, Tip & Fold seats

REAR CUT FLOOR IS AVAILABLE FOR FOLLOWING VEHICLE MODELS:

CITROËN Berlingo	MERCEDES-BENZ Citan/T-Class	PEUGEOT Rifter
CITROËN ë-Berlingo	MERCEDES-BENZ Vito (FWD)	PEUGEOT e-Rifter
CITROËN SpaceTourer	MERCEDES-BENZ Vito (RWD)	PEUGEOT Traveller
CITROËN ë-SpaceTourer	MERCEDES-BENZ eVito	PEUGEOT e-Traveller
DACIA Dokker	MERCEDES-BENZ V-Class	RENAULT Kangoo
FIAT Doblò	NISSAN Townstar	RENAULT Trafic
FIAT E-Doblò	NISSAN NV300	TOYOTA Proace City
FIAT Scudo	OPEL Combo Life	TOYOTA Proace City Electric
FIAT E-Scudo	OPEL Combo-e Life	TOYOTA Proace
FORD Connect	OPEL Zafira Life	TOYOTA Proace Electric
FORD Custom	OPEL Zafira-e Life	VOLKSWAGEN Caddy

Please contact Smartfloor for more information and all possibilities.

To be on the safe side

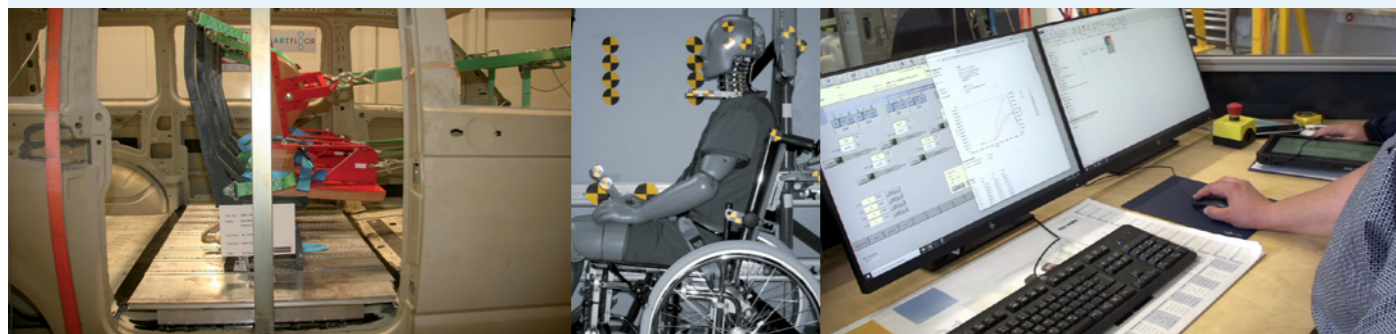

The safety of every wheelchair occupant is our top priority at Smartfloor and is of central importance for all our innovations.

Smartfloor is the leading supplier of system floors and related products for the conversion of accessible vehicles in Europe. This leading position is both a responsibility and a motivation for Smartfloor to ensure that all aspects of its products, which have quality and safety implications, are subject to the strictest of controls. All production work is completed in accordance with the ISO 2001 standard. In addition, all lifts and ramps which the company delivers are TÜV-tested in 20 G front-on vehicle crashes.

All Smartfloor products offer a high level of safety. Vehicle floors equipped with the Smartfloor meet all safety requirements of the stringent EU directives such as UN-ECE R14, R16, R17, ISO 10542 and DIN standard 75078. All surfaces which may present a slip hazard in the vehicle comply with slip resistance class R11. Lifts and electric steps are subjected to thorough EMS tests and then approved by the German Federal Office for Motor Vehicles.

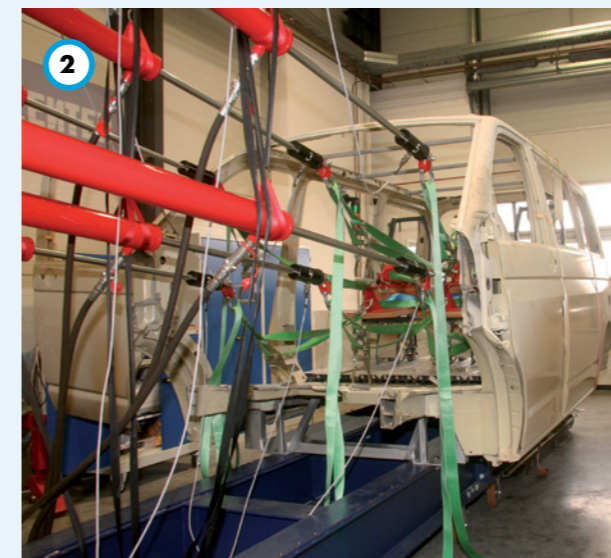

In order to further improve safety and protection for people with mobility restrictions, Smartfloor and its partner AMF-BRUNS have been successfully working in cooperation with competent partners such as TÜV Nord, TÜV Rheinland, BAST, UTAC (France), AIB Vinçotte (Belgium), Status (United Kingdom), Volkswagen, Mercedes Benz, RDW Holland and the German Federal Office for Motor Vehicles.

A major step in the quest for "even more tested safety" has been taken by Smartfloor and AMF-BRUNS with its new in-house accredited test equipment at AMF-BRUNS in Apen, Germany. Together with the Dutch RDW and German TÜV or the British VCA, Smartfloor now tests and examines safety-relevant components, products and retrofitting in house. In future, for example, seat testing, strength testing of built-in vehicle components or wheelchair restraining systems will become routine in our own test centre for all types of vehicles on the market. With up to eight special cylinders the required tension is built up within a matter of milliseconds. In the meantime, other conversion companies are also taking the opportunity to have testing done by Smartfloor.

Images:

1. A vehicle body is fixed to the stable test system frame ready for the tension trials.

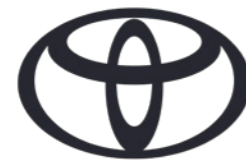

2. Special pulling cylinders ensure that a force equivalent of up to 20 G front-on vehicle crash is built up within milliseconds.

3. This shows a test with 3 M1 seat dummies, aimed at testing Smartfloor's seat fixings, the so-called "Smartlegs" on the Smartfloor system floor.

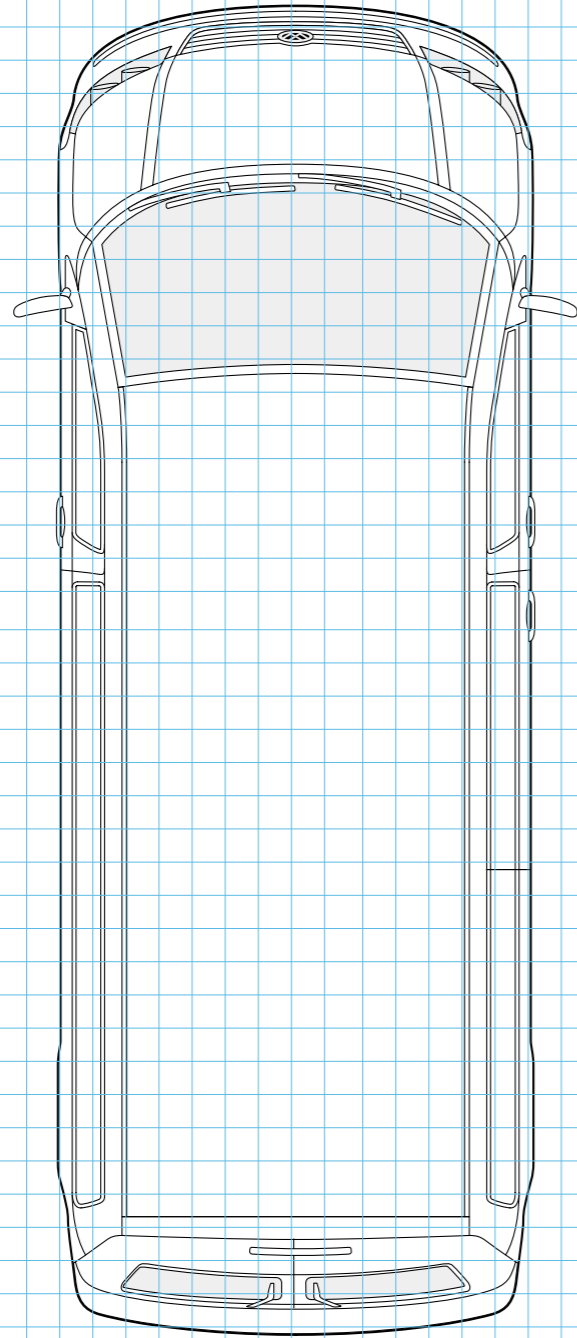

The following vehicles have been tested by TÜV and Smartfloor with regards to anchorage points. Test certificates and Installation Manuals are available at www.smartfloor.eu.
