Jobri® Supporting Healthy Lives

Quality the Jobri® Way

At Jobri® we test against the highest global standards.

At Jobri we use the highest quality materials and workmanship in everything that we do. Jobri focuses on real, quantifiable measures to demonstrate our superior performance:

FABRICS

High Rub Count Fabrics: Cheaper fabrics have 15K – 20K rub count, and Jobri fabrics all have over 50K rub count.

Hook & Loop Fastener: The high density of loops and hooks per square inch create high tear strength and more cycles of opening & closing.

HIGH QUALITY FOAMS

ILD (Internal Load Deflection) We customize both ILD (firmness) and Density (long life) to maximize comfort and durability.

Memory Foam: High density memory foam for longer life and durability.

BiFomPad Technology: Deluxe memory foam with a base support foam to achieve an optimum level of support and comfort.

INDUSTRY TESTING STANDARDS

All Jobri chairs are compliant.

CARB (#93120) Formaldehyde Certification: California Air Resources Board requires that standard wood materials do not contain the formaldehyde chemical. All Jobri products are compliant.

BetterPosture®

Ergonomic Products

GOOD posture is defined as the position in which you hold your body upright against gravity, achieving good spinal alignment, whereby the least strain is placed on the ligaments and muscles. Poor posture has been linked to back & cervical pain, discomfort & fatigue, jaw & dental misalignment, and strain to other skeletal joints.

GOOD posture is not a natural skill, but instead is a learned HABIT. Jobri's BetterPosture® Ergonomic Products were designed to help promote and train the development of good posture, and serve as a daily reminder of practicing these good habits. From Bio-feedback training devices to ergonomic chairs that strengthen core muscles, our products strive to help users develop good habits and muscular core strengths.

In summary, we all know that GOOD posture makes us look and feel slender, healthy, and more confident.

BetterPosture® Ergonomic Products

BackTone Bio-feedback Posture Training

A bio-feedback posture trainer, designed by an Occupational Therapist to promote good postural habits and prevent slouching. Simple to use, comfortable to wear. The easy way to re-train your body to great posture.

BP4000

BetterBack® Back Care Products

Comfortable, anatomically correct sitting is essential for both good health and personal well-being. Sitting incorrectly in the same position for extended periods of time can cause backaches, strain and excessive fatigue. Jobri® prides itself in the design and manufacture of high quality back support products that are specifically structured to follow the natural shape of the human body.

BetterBack® Back Care Products

BetterBack®

BetterBack® ErgoSeat is a portable and foldable back support, ergonomically designed to support proper neutral spine alignment and to promote correct posture.

BetterBack® ErgoSeat

- Molded wooden seat discourages slouching and ensures optimal back support.
- Durable luxurious polysuede fabric.
- Adjustable strap for easy attachment to chair/car seat.
- Includes removable, height adjustable LumbiPad.
- Colors available: Black / Blue / Grey

BB1000

BetterBack® Lean On ErgoSeat

The same anatomically-contoured back rest found on the popular BetterBack® ErgoSeat support, but without the seat portion. Use it at the office, in your car, for reading in bed and for spinal molding in a back-lying position.

- Colors available: Black / Blue / Grey

BB1050

BetterBack® Lumbar Rolls

All Jobri® BetterBack® Lumbar Rolls come with supportive polyurethane foam and offer light lumbar support for pain relief and comfort. Designed to promote proper posture and reduce pressure on the lower spine. Ergonomically designed for all day comfort. Perfect for use at home, in the office or when traveling.

BetterBack® Lumbi Pad (BB1090)

- Use with BetterBack® Lean On, or as a stand alone support
- Premium polysuede fabric
- Provides additional lumbar support
- Includes elastic strap
- Colors available: Black / Blue / Grey

- Colors available: Black / Blue / Grey

BetterBack® Industrial Belts

Designed to keep your spine in line, which promotes proper lifting techniques to reduce the strain of the lower back. Perfect for use during workplace bending and lifting, recreation or home activities.

BetterBack® Industrial Belt - No Suspenders (BB2200)

BetterBack® Industrial Belt - Sewn in Suspenders (BB2210)

BetterBack® Industrial Belt - Removable Suspenders (BB2220)

- Ventilated and lightweight for comfortable fit
- Supplies maximum support & comfort
- Tried and proven, made in the USA with superior raw materials for more than 25 years
- High density elastics and fasteners increase the life of the product
- Colors available: Black (White by request)
- Sizes available: Small / Medium / Large / X-Large / XX-Large

BetterBack® Traction Therapy

Inversion helps your body to recover from the compression effects of gravity and daily activities. It stimulates circulation of blood to relieve stiff and painful muscles, increases body flexibility, clears muscle congestion, and increases physical and mental energy. Inversion is used to treat many conditions of the spine.

BetterBack® Inversion Table (BB3200)

- The inversion table is designed for users 4'9" up to 6'6" in height
- Highest grade steel, maximum weight limit of 300 lbs
- Natural traction that helps to decrease pressure on intervertebral discs
- Both ankle cup and foam roller technologies are included for customized ankle support
- Ratchet foot locking mechanism for ease of use
- Easy to assemble, and folds compact for storage

BetterBack® Traction Therapy

Why Back Traction is Good:

Traction helps your body to recover from the compression effects of gravity and daily activities. It stimulates circulation of blood to relieve stiff and painful muscles, increases body flexibility, clears muscle congestion, and increases physical and mental energy. Inversion is used to treat many areas of the spine. The Nubax Trio Traction device, through its unique design and motion, creates an arc when rotated forward, using your own body weight it gently stretches your spine.

nubax[®] Trio

BetterBack® Nubax Trio Traction Device (BB7100)

- New generation of traction, providing a gentle but strong and effective traction to the spine.
- Patent protected, clinically proven, and FDA approved.
- Provides beneficial therapy for a wide range of back conditions.
- Useful for building and maintaining a strong and healthy back as part of a normal fitness routine.

A New Revolutionary Product For Back Traction!

BB7100

 Jobri™ Supporting Healthy Lives

BetterBack® Traction Therapy

The Nubax technology is simple, yet so effective. This new and advanced spinal decompression device has distinct advantages over its more dated competitors, delivering superior results. For years inversion table therapy has been the only option for sufferers of back pain looking to employ a self care strategy. Now there is Nubax; a new, unique, clinically-trialed technology for treating back pain that put simply, just works better.

Nubax vs. Inversion Table

- Nubax Trio is clinically trialed
- No hanging upside down
- Nubax Trio can be used anywhere, anytime
- Users of the Nubax Trio can safely extricate themselves at anytime while using the unit
- The Nubax Trio is far superior in regards to user comfort
- Portable, compact, and easy to store
- There is no pressure placed on ankles and knees
- The Nubax Trio holds the spine in a completely natural position
- The shoulders and the hips are held square to the spine so that the traction is safely applied without risk of additional injury.

- Research conducted on inversion therapy is old and contradictory
- Hanging upside down can produce side effects related to blood pressure and the digestive system (high blood pressure, additional pressure on the heart, and brain, reflux etc.)
- Users have great difficulty using this device unsupervised not to mention the danger involved in doing so
- Sufferers of glaucoma have experienced nasty side effects
- Inversion tables are bulky, heavy and not portable
- There is strain on the knees and ankles, which are designed for compression forces, not tension forces
- Inverting the body accentuates Lordosis of the spine

BetterRest®

Sleep Products

Jobri's BetterRest products were designed for good overall orthopedic and skeletal health. This helps alleviate strain to the lower back, promote good cervical curvature, proper alignment of hips and overall reduction of body stress. All of these products strive to help users achieve and maintain deeper and more consistent sleep patterns.

The average person spends more than 40% of their life in their bed sleeping, reading, or watching TV. It is crucial that this time be spent minimizing the stress to our body.

BetterRest® Sleep Products

 Jobri™ Supporting Healthy Lives

BetterRest®

Cervical Pillows

Memory cervical pillows provide therapeutic neck support by conforming to and properly aligning your head and neck with your spine. Our pillows are made from premium memory foam and are ergonomically designed for optimum support of the natural curve of the spine. Helps to relieve back, neck and shoulder pain.

BetterHealth Mor-Loc Orthopedic Belts & Cervical Collars

Mor-Loc complete comprehensive respected brand of orthopedic belts and braces have been exclusively manufactured in the USA for more than 40 years.

Contract Jobri for more details.
website: www.jobri.com

BetterHealth MorLoc Orthopedic Belts & Cervical Collars

- These durable products are manufactured exclusively from the highest quality USA raw materials.
- These products are specified and fitted by medical professionals.
- Many customers look to the trusted Mor-Loc name when re-ordering.

The graphic features a dark blue header with the 'MOR·LOC' logo in white. Below the header is a green horizontal band with the slogan 'Supports Healthy Lives' in white. The central part of the graphic shows four stylized human figures in white outlines. One figure is standing upright, another is standing with a slight hunch, a third is bent over at the waist, and a fourth is standing upright. The text 'For over 35 years Our Tradition of Excellence Continues...' is positioned to the right of the figures. At the bottom of the graphic is a dark blue footer with the 'MOR·LOC' logo in white.
