

AL435 3-AXIS

THE ULTIMATE HOIST LIFT SOLUTION

PREMIUM 3-AXIS INSIDE LIFT

The AL435 powered-boom maneuvers even large power wheelchairs or scooters into small vehicle openings. More versatile and flexible, for use inside a van, SUVs and pick-up trucks. The AL435 provides fully powered lifting, boom extension, and rotation for the easiest and most effortless loading. The power extend function allows for precise positioning while rotating into a tight cargo area.

- Power lifting, extension, and rotation
- Simplified base fits in a smaller footprint
- Passenger or driver side installation
- Weather-resistant hand control
- Docking device and universal base adapter included

Easy-to-use, tethered hand control with soft-touch buttons.

We wanted a lift that would fit in our minivan and be easy for us to operate when loading and unloading my husband's scooter. The AL435 was our first choice, we are able to retain use of the second row of seats, which is nice when we have our grandkids.
