

COMBINED ACCELERATORS AND BRAKES

FA1 - ROTATING ACCELERATOR/BRAKE FLOOR MOUNTED LEVER

The FA1 is a tall slim and unobtrusive solution. We have based this new design on customer feedback resulting in a more complete floor mounted lever.

As an optional we have incorporated the essential secondary controls, lights, horn and indicators into the lever itself, allowing you the end user to activate them without taking your eyes off of the road.

Mechanical acceleration is achieved by simply rotating the extended lever and push forward to brake.
