**MOULDED VISCOELASTIC FOAM WITH MEMORY EFFECT**

- Precise moulding of the body and increase of the body surface in contact with the cushion;
- Better pressures distribution: reduction of transcutaneous pressures on areas at high risk and facilitated blood circulation;
- Improved comfort and stability of the patient;
- Skin effect obtained through the moulding process: protection of the foam against external aggressions (tear, crumbling);
- With a very high density to prevent deformation and sagging effects.

**SURFACE CONTAINING VENTS**

- Better circulation of air to reduce the effects of maceration.
- Better accompanying of the body by the material during movement to reduce surface frictions.

**SKIN EFFECT FROM MOULDING PROCESS**

- Protects the product against external aggressions.

ULTRA-LIGHT

**HIGHLY BREATHABLE COVER**

- Adapted for incontinence
- Reduces the maceration effects through easing the skin respiration.
- Impermeable material

**ANATOMICAL SHAPE WITH RAISED LATERAL EDGES AND FRONT-BACK SLOPE**

- Improves the positioning, the stability and the comfort of the patient;
- Increases the contact surface and therewith reduces the pressures.

**AN ANTI-SLIP BASE**

- Avoiding any sliding of the cushion from the support (POLYMAILLE® only).
