Motala 2000

Motala Hissar is renowned as a supplier of robust lifts for private dwellings and public places and spaces. 40 years of experience, expertise and proven technology enables us to develop the smartest lifts for domestic environments on the market.

The call for convenience in all walks of life has never been louder. This is particularly so where convenience in the home is concerned. The conditions under which it is possible to continue living in your own home very much depend on the functional abilities of the occupants, and it is in this context that lifts in private homes come into their own. Until now the residential provision of lifts for effortless transition between floors has almost exclusively been confined to retirement homes and housing for the functionally impaired.

Not any more! Quite simply the advent of Motala 2000 Home makes the provision of lifts in private residences a viable standard feature. Apart from contributing to a safer and more comfortable home for its users, Motala 2000 Home also increases the desirability and value of the property.

Motala 2000 Home - give your Home a lift

Safe and reliable

Motala 2000 Home uses guided chains for lifting. This results in greater safety and reliability than that of alternative solutions. No oil required as it is in hydraulic lifts, and no wear and tear as in the case of screw lifts.

Elegant design

Exclusive oak in wooden details.* All sides of the lift/elevator shaft can be fitted with glass.* Control panels in stainless steel. Optional RAL-colours for the lift/elevator shaft.*

Compact size.

Most space on the platform in proportion to the outer dimensions.

* Options

User-friendly

Large legible buttons combined with the control panel's simple, logical design, Motala 2000 Home is easy to use for children, adults and the disabled.

Fast installation

Our practiced and experienced technicians carry out the complete installation of a Motala 2000 Home in less than a week.

Environmentally-friendly

Energy efficient, silent with smooth start and stop system. Engine power (0.55kW), about a quarter of what equivalent lifts/elevators might use.

Motala 2000 Home is available in three different dimensions.

Common for all the sizes are widths, 950mm externally, 870mm internally. Three different depths to choose from: 1150, 1250 and 1350mm.

Shaft dimensions	1150 x 950
Platform dimensions	1020 x 870
Shaft dimensions	1250 x 950
Platform dimensions	1120 x 870
Shaft dimensions	1350 x 950
Platform dimensions	1220 x 870
